"Why do I need a new chart? Those things are getting pretty expensive and they really don't change that much!" A reasonable observation, but there's a lot more happening on your chart than you might realize. Dick Neher from the FAA Charting Office will present; "Aeronautical Charts - Facts You May Not Know". This program is applicable to all airmen and qualifies for the safety meeting requirement of the FAA Pilot Proficiency Program - WINGS, which will sunset on December 31, 2006.

Directions: The presentation will be in Cafeteria #3.

Message from the National Safety Program Manager:

Safety is a learned behavior...Learn to be safer at the Learning Center found on
